***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to A Method to Form A Removable Compression Seal Between An Electronic Module and A Cap, classified in class 29, subclass 883.
  - II. Claims 13-24, drawn to A System to Form A Removable Compression Seal Between An Electronic Module and A Cap, classified in class 439, subclass 71.
2. Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the claims of Group II do not require the steps of configuring a tapered edge on at least a portion of the edge defining a perimeter of the electronic module of the claims Group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
